Commercial Grade Aluminum Furniture with Texteline Mesh

Padded Sling Chaise Lounges are an attractive, high end look with comfortable seating for relaxing by the pool deck of hotels, club houses, resorts, or beach clubs. The padded seat is made with two pieces of durable material sewn together with fiberfill in the middle for more comfortable plush seating. This product is commercial grade made with strong aluminum and is UV resistant. Choose from a double powder coating, brush finish or an Anodize aluminum finish for KD designs.

Las tumbonas - Sling Chaise son atractivas y de alta gama con cómodos asientos para relajarse en la terraza de la piscina de hoteles, casas club, resorts o clubes de playa. El asiento acolchado está hecho con dos piezas de material duradero cosidas juntas con relleno de fibra en el medio para un asiento de felpa más cómodo. Este producto es de grado comercial hecho con aluminio fuerte y es resistente a los rayos UV. Elija entre un doble recubrimiento en polvo, acabado de cepillo o un acabado de aluminio anodizado para diseños KD.

Heavy Duty Polymer Lounge Chaise

- Good chemical resistance
- High strength to weight ratio
- Corrosion resistant
- Strong impact resistance
- Strong light stabilization for UV resistance
- High resistance to cracking
- Fatigue resistant and durable
- Stackable

- Buena resistencia química
- Alta resistencia a la relación de peso
- Resistente a la corrosión
- Fuerte resistencia al impacto
- Fuerte estabilización de la luz para resistencia a los rayos UV.
- Alta resistencia al agrietamiento.
- Resistente a la fatiga y duradera.
- Apilable

OPE4009-S

ABOUT OUR PRODUCT....

What are the Characteristics of Polypropylene?

- **Chemical Resistance:** Diluted bases and acids don't react readily with polypropylene, (polymer) this makes the product strong for outdoor use and perfect for those commercial clients that need a NO FUSS durable product.
- **Elasticity and Toughness:** Polypropylene will act with elasticity over a certain range of deflection, but it will also experience plastic deformation, so it is generally considered a "tough" material. Toughness is an engineering term which is defined as a material's ability to deform (plastically, not elastically) without breaking..
- **Resistance:** Polypropylene retains its shape after a lot bending, and/or flexing. This property is especially valuable for making outdoor furniture
- **Insulation:** polypropylene has a very high resistance to UV and heat therefore making it a very durable product for commercial use. .

Polypropylene- Polymer Plastic

OPE4009 D

Polypropylene (PP) is the safest of all plastics, this is a robust plastic that is heat resistant, durable light weight yet very strong, UV resistant and stackable.

Texteline is a superb fabric specially formulated to withstand wear and tear for many years of outdoor use. The non-stretch mesh fabric is woven together with strong polyester yarns that are individually coated with PVC. This product is the best choice for sling furniture due to its elegance, strength and durability.

Easy to maintain and repair.

Double padded texteline

Fácil de mantener y reparar.

El polipropileno (PP) es el más seguro de todos los plásticos, es un plástico robusto que es resistente al calor, duradero y ligero, pero muy resistente, resistente a los rayos UV y apilable.

Texteline es un excelente tejido especialmente formulado para resistir el desgaste durante muchos años de uso en exteriores. La tela de malla no elástica está tejida con hilos de poliéster resistentes recubiertos individualmente con PVC. Este producto es la mejor opción para los muebles de honda debido a su elegancia, resistencia y durabilidad.
